Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In claim 42, amend as follows:

Claim 42 (Amended): An image processing apparatus comprising:

a setting unit adapted to set, so as to make a density of an output image higher than a density of an input image, an extent of a correction for the input image in accordance with a ratio of a shadow area in the input image,

wherein, in case where the ratio of the shadow area is large, the extent of the correction is set so as to make the increase of the density small as compared with a case where the ratio of the shadow area is small.

Reasons for Allowance

Claims 1-9 are allowed for the reason the prior art does not teach in claimed combination, "... setting the correction conditions for correcting components regarding the brightness of the image data on the basis of the calculated ratio."

Claim 10 is allowed based upon the persuasiveness of the argument.

Claims 11-15 and 25 are allowed for the reasons set forth in the office action mailed Aug. 12, 2004.

Claim 16 is allowed for the reason the prior art does not show in claimed combination, "... setting means for setting the correction conditions for correcting components regarding the brightness of the image data on the basis of the calculated ratio."

Claim 17 is allowed based upon the persuasiveness of the argument.

Claims 18 and 21 are allowed for the reasons provided in the office action mailed Aug. 12, 2004.

Art Unit: 2626

Claim 19 is allowed for the reason the prior art does not teach in claimed combination, code for setting the correction conditions for correcting components regarding the brightness of the image data on the basis of the calculated ratio.

Claim 20 is allowed based upon the persuasiveness of the argument.

Claim 22 is allowed for the reason the prior art does not teach or suggest, "... wherein the discrimination of the color distribution of the image is executed by acquiring a highlight point and a shadow point of the image from the histogram, and a cumulative frequency of a predetermined range of the histogram."

With respect to claims 23 and 24, the prior art does not show "...wherein said discrimination unit executes the discrimination of the color distribution of the image by acquiring a highlight point and a shadow point of the image from the histogram, and a cumulative frequency of a predetermined range of the histogram.

Claims 26-28, 32 and 34 are allowed for the reason the prior art does not teach or suggest in claimed combination, determining an extent of the correction on the basis of the discriminated degree of lightness of the image and the acquired ratio of cumulative frequency and correcting the brightness of the image data on the basis of the determined extent of the correction .

Art Unit: 2626

Claims 29-31, 33 and 35 are allowed based upon the uniqueness over the prior art regarding the last three limitations of the claim.

Claims 36 and 37 are allowed for the reason the prior art does not teach or suggest in claimed combination, "... determining an extent of the correction based on the calculated brightness value and correcting the brightness of the image data based on the determined extent of the correction."

Claims 38-40 are allowed in that the prior art does not address ... extent of a correction for the input image in accordance with a ratio for a shadow area in the input image.. in a case where the ratio of the shadow area is large, the extent of the correction is set so as to make the increase of the density small as compared with a case where the ratio of the shadow area is small. "

Claim 41 is allowed for the reason the prior art does not teach in claimed combination, "... determination unit adapted to determine an extent of the correction based on the calculated brightness value; and a correction unit adapted to correct the brightness of the image data based on the determined extent of the correction."

Claims 42 and 43 are allowed for the reason the prior art does not teach or suggest in claimed combination an extent of a correction for the input image in accordance with a ratio of a shadow area in the input image.. and in a case where the ratio of the shadow area is large, the extent of the correction is set so as to make the increase of the density small as compared with a case where the ratio of the shadow area is small.

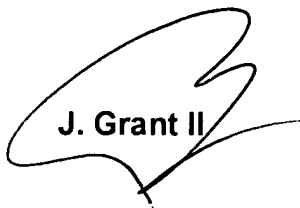

Claim 44 is allowed for the reason the prior art does not teach or suggest in claimed combination, "... an extend of correction for the input image in accordance with a ratio of a shadow area in the input image .. in a case where the ratio of the shadow area is large, the extent of the correction is set so as to make the increase of the density small as compared with a case where the ratio of the shadow area is small.
